DETAILED ACTION

The Election without traverse of Group III claims 25 and 29 in the reply received on 3/26/2006 is acknowledged. The cancellation of claims 1-10 and 26-28 in the reply received on 3/26/2006 is also acknowledged.

The addition of new claims 30-35 by Applicant in the reply received on 3/26/2006 have necessitated the restriction requirement set below.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 30-31, drawn to a method of producing starch comprising modifying characteristic(s) of a plant comprising introducing a combination of sequences on a single nucleic acid construct, classified in class 435, subclass 468, for example.
- II. Claim 32, drawn to a method of producing starch comprising modifying characteristic(s) of a plant comprising introducing a combination of sequences wherein a first sequence is introduced into a plurality of plants and one or more of the plurality of plants is selected for introduction of a second sequence, classified in class 800, subclass 260, for example.

Claims 25, 29, and 33-35 link inventions I and II. The restriction requirement of the linked inventions is subject to the nonallowance of the linking claims, claims 25, 29 and 33-35. Upon the indication of allowability of the linking claims, the restriction requirement as to the linked inventions shall be withdrawn and any claims depending

from or otherwise requiring all the limitations of the allowable linking claims will be rejoined and fully examined for patentability in accordance with 37 CFR 1.104 Claims that require all the limitations of an allowable linking claim will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

Applicants are advised that if any claims including all the limitations of the allowable linking claims is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. In re Ziegler, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The inventions are independent or distinct, each from the other because:

Inventions I and II are directed to related processes. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, the Inventions have a materially different design and a materially different mode of operation.

The construct of Invention I requires nucleic acid sequences not required by the constructs of Invention II. Invention II requires additional plant transformation steps, plant breeding steps and materials not required by Invention I.

For the reasons given above, Invention I is distinct from Invention II and restriction is therefore proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
